AVACKAA MICHEAL A. JR

Full-Stack Developer | Python (FastAPI) & PHP (Laravel)

Jos, Plateau State, Nigeria | avackaamicheal@gmail.com | +2348068097685 | linkedin.com/in/michealavackaa | github.com/avackaamicheal

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience designing, developing, and deploying robust web applications and RESTful APIs. Proficient in frontend technologies (HTML5, CSS3, Bootstrap, Tailwind CSS) and specialized in modern backend architectures using PHP (Laravel) and Python (FastAPI). Combines rigorous analytical discipline from a Biochemistry background with practical technical experience in database design, asynchronous routing, schema migrations, and technical training to deliver scalable digital solutions.

TECHNICAL SKILLS MATRIX

Frontend: HTML5, CSS3, Tailwind CSS, Bootstrap, JavaScript (ES6+), Responsive Design, DOM Manipulation

Backend: Python, PHP, FastAPI, Laravel, MVC Architecture, Object-Oriented Programming (OOP), Asynchronous Programming

APIs, Databases & Migrations: RESTful API Design, JSON Data Schemas, PostgreSQL, MySQL, SQLite, SQLAlchemy, Alembic, Eloquent ORM

Integrations & Delivery: Paystack, Monnify, Webhooks, Application Deployment, CI/CD Pipelines

Dev Tools & Practices: Git & GitHub, Postman, Linux Environment, Unit Testing, Agile/Scrum Workflow, System Debugging, Technical Instruction & Mentoring

TECHNICAL & PROFESSIONAL EXPERIENCE

Full-Stack & Backend Developer Intern
Dec 2025 – Present

Axia Technology & Innovation Hub

Software Engineering, API Integration & Web Application Development

- Engineer server-side applications and high-performance microservices using Python (FastAPI) and PHP (Laravel).
- Develop responsive, mobile-first web user interfaces utilizing HTML5, CSS3, Tailwind CSS, and Bootstrap components.
- Design relational database schemas and optimize query performance across PostgreSQL and MySQL database systems.
- Build and document standard RESTful API endpoints consumed by internal operational tools and member dashboards.
- Troubleshoot application bugs, review code for best practices, and participate in sprint planning sessions.

Backend Instructor (PHP, MySQL & Laravel)
Dec 2024 – Present

Axia Technology & Innovation Hub

Technical Instruction, Curriculum Delivery & Developer Mentorship

- Deliver hands-on lectures and practical training on PHP fundamentals, Object-Oriented Programming (OOP), and the Laravel MVC framework.
- Train students in relational database modeling, normalization, indexing, and complex SQL querying in MySQL using Eloquent ORM.
- Guide learners through building production-ready RESTful APIs, implementing robust authentication, and integrating database migrations.
- Conduct regular code reviews, assess project submissions, and mentor aspiring developers in software engineering best practices and Git collaboration.

FEATURED SOFTWARE PROJECTS

Student_Cloud — School Management System

Laravel (PHP) | MySQL | Blade | Bootstrap / Tailwind CSS

- Architected a full-stack school management web application using Laravel's MVC pattern to streamline student administration, enrollment records, and academic tracking.
- Designed and migrated normalized relational database schemas in MySQL, leveraging Eloquent ORM to handle complex entity relationships across courses, classes, and students.
- Implemented secure authentication, session management, and role-based permissions (RBAC) to control access for administrators, teachers, and students.

BookIT — Asynchronous Booking & Reservation API

FastAPI | Python | PostgreSQL / SQLite | SQLAlchemy | Alembic | Pydantic | Postman

- Developed a high-performance asynchronous RESTful API for handling real-time appointments, resource scheduling, and booking reservations.
- Configured Alembic to manage database versioning, programmatic schema migrations, and seamless evolution of persistent tables.
- Defined strict request serialization using Pydantic models and structured relational data models with SQLAlchemy ORM to ensure concurrency safety.

Secure User Authentication & Account Management System

PHP | MySQL | HTML5 | CSS3 | JavaScript

- Engineered a custom authentication and access control module from scratch using native PHP and MySQL without external backend frameworks.
- Implemented secure password hashing (bcrypt), session hijacking protection, CSRF token validation, and SQL injection prevention via PDO prepared statements.
- Crafted a responsive, intuitive frontend interface using semantic HTML5 and custom CSS for sign-in, user registration, and account recovery workflows.

EDUCATION & CREDENTIALS

Bachelor of Science (B.Sc.) in Biochemistry — *Second Class Division* **2012**
University of Jos, Plateau State, Nigeria

West African Senior School Certificate (WASSCE) **2006**
Emmanuel International College, Plateau State, Nigeria
